PROFESSIONAL SUMMARY

Software Developer with 3+ years of experience building production React, Next.js and TypeScript applications for YourGPT, an AI agent platform with 15K+ deployed AI agents and 20M+ messages processed. Builds customer-facing dashboards, internal tools and reusable component systems with shadcn/ui and Radix UI, with a strong focus on performance and accessibility, and brings interfaces to life with Framer Motion and GSAP.

SKILLS

Primary Skills: JavaScript (ES6+), TypeScript, React, Next.js, React Native, Expo, HTML5, CSS3, Redux Toolkit, Zustand, Tailwind CSS, shadcn/ui, Radix UI, Motion (Framer Motion), GSAP, Responsive Design, Web Performance, Accessibility (a11y), REST APIs

Additional Skills: Node.js, Socket.IO, PostgreSQL, Prisma, Supabase, Base UI

Tools and AI: Git, GitHub, Vercel, Vite, npm, Claude Code, OpenAI Codex, Cursor

EXPERIENCE

Frontend Developer | Delta4 ([YourGPT](#))

May 2023 - Oct 2026

- Core frontend engineer on four flagship products, from first build to launch, using React, Next.js and TypeScript.
- Chatbot Dashboard:** developed much of the command center businesses use to run their 15K+ deployed AI agents, including the unified inbox for every channel, visitor tracking and customer feedback.
- Chatbot Widget:** engineered the embeddable chat widget from its first version, putting YourGPT's AI agents on client websites as the touchpoint behind 20M+ messages in 100+ languages.
- AI Studio:** delivered core parts of the no-code agent builder where users design multi-agent workflows, connect apps and APIs, set up human handoff and test agents in an emulator before going live.
- AI Helpdesk:** shipped the AI-first support platform from the ground up, including intent-aware search, self-service flows, a brandable support widget and AI-written help articles.
- Admin panel:** built the internal control center the team uses to manage users, subscriptions and AI agents.

PROJECTS

[Interviewm](#) | Next.js 16, React 19, TypeScript, PostgreSQL, Prisma, Groq API | interviewm.thakurgourav.in

- Designed and shipped a full-stack AI mock interview platform end to end (UI, brand, backend, database and deployment) with the Next.js App Router, Tailwind CSS v4, Motion and Redux Toolkit.
- Generated interview questions and answer feedback with an LLM through Groq's API, scoring each answer from 0 to 10 with a written feedback paragraph stored in PostgreSQL via Prisma.
- Implemented authentication with custom JWT sessions (jose), bcrypt-hashed passwords and Google OAuth.
- Added a fallback to stock questions and rule-based scoring when the AI call fails, so interviews never break.

[Bobblehead](#) | React, npm package | [npm](#)

- Created an animated React mascot that sits at the top of a page and follows the user's cursor.
- Gave the mascot playful click reactions with smooth, performant animations.
- Published it as an open-source npm package that drops into any React project.

iOS Apps (Freelance) | React Native, Expo | [Offline Activities](#), [Silent Habits](#)

- Developed screens and features for two client iPhone apps in React Native (Expo), both live on the App Store.
- Offline Activities suggests screen-free activities based on location and company, with a random picker.
- Silent Habits is a habit tracker where users log only skipped days, with a calendar view and skip-pattern insights.

[React Component Library](#) | React, shadcn/ui, Tailwind CSS | thakurgourav.in/components

- Designed a collection of reusable React components, each with a live, interactive demo.
- Made every component installable into any project with a single shadcn CLI command.
- Styled components with Tailwind CSS so they are easy to customize and match any design system.

EDUCATION

Master of Computer Applications (MCA) | Chandigarh University

2024 - 2026

Bachelor of Science (B.Sc.) | DAV College, Jalandhar

2018 - 2021
